

XTREM BOTS

Discover the fascinating world of robotics with Xtrem Bots: Toys to build, program and have fun. With Xtrem Bots you will discover robotics in a fun way and develop your STEM skills. You will learn about and put into practice basic notions of programming. Let your creativity flow to solve challenges and learn to program in a fun way through play.

BOBBY

Cheer BOOMER up!

Gently stroke BOOMER's head to witness its captivating display of emotions come to life. Take care of Boomer, when he is sad, anger, hunger even happy.

Learn to program easily

Thanks to its intuitive controls, operating BOOMER is a breeze. BOOMER can sit, walk, dance, and most importantly, it'll bring a smile to your face with its cheerful woof-woof!

Sits like a real dog!

BOOMER responds to actions via the easy-to-use remote control. You can command him to sit or even lie down, just like a real dog.

ROBBIE
S♥PHIE

Robbie & Sophie are such cool robots that they will easily become your best friends.

Together you will have a lot of fun learning how to program.

Robbie & Sophie will introduce you to the fantastic world of programming: you can program up to 50 actions, 2 modes of movement (walking or sliding), 2 speed settings, more than 20 functions, dance mode, and 20 facial expressions with sound. All of this accompanied by countless intelligent sensors and robotic sounds, which will immerse you in the world of robotics in a simple and fun way. Recharge Robbie & Sophie with the included USB charger.

You can play with Robbie & Sophie by controlling them with a remote control, without the need to program it or best of all, you can also control them with your hand movements, thanks to their "SMART CONTROL".

These magical robots inspire enthusiasm and imagination, offering endless possibilities of fun.

Program, dance, laugh and play with Robbie & Sophie!

Functions:

- "Smart control" system (Control with hands movements).
- Programmable up to 50 actions and more than 20 functions.
- 20 facial expressions with sound.
- 2 speeds and 2 displacement modes: walks or slides, in all 4 directions.
- Robotic dance.
- Robotic sounds, music and LED lights.
- Demo mode.

Product information:

- Age: +5 years.
- Robot height: 27,5 cm.
- Packaging dimensions: 25,5 x 12,5 x 31,5 cm.
- Infrared transmitter with more than 5m range.
- Charged by USB system. Cable included.
- The remote control works with 2 AA batteries. Not included.
- The robot is powered by LiPo 3,7V, 600 mAh battery. Included.

**XTREM
BOTS**

PATROL

Have fun with Patrol, the Police Robot!

Join Patrol on all its missions and police persecutions and at the same time learn how to program, the fun is guaranteed! Let your imagination fly and become Patrol's best partner.

With Patrol you can programme up to 50 actions and activate its police sounds. It has 2 displacement modes (walking and sliding), more than 20 functions and 2 speeds settings. Recharge Patrol with its included.

This super robot will provide you with endless hours of entertainment.

Play with Patrol the Police Robot, use the "Spy" function to spy and listen to conversations, send messages and stop the bad guys: surprise them with sound effects and Patrol's LED flashlight!

Patrol, your super robotic agent!

Functions:

- "Spy" function: records and plays back sounds.
- Police sounds (alerts, records and plays sounds).
- Programmable up to 50 actions and more than 20 functions.
- 2 speeds and 2 displacement modes: walks or slides, in all 4 directions.
- Robotic dance.
- Torch.
- Robotic sounds, music and LED lights.
- Demo mode.

Product information:

- Age: +5 years.
- Robot height: 31,5 cm.
- Packaging dimensions: 34 x 13,5 x 32 cm.
- Infrared transmitter with more than 5m range.
- Charged by USB system. Cable included.
- The remote control works with 2 AA batteries. Not included.
- The robot is powered by LiPo 3,7V, 600 mAh battery. Including.

**XTREM
BOTS**

ELITE TROOPER

Discover Elite Trooper, the missile-launching robot.

No one is able to stop it! Powerful, strong and fast!

You can control the robot's arms and program up to 50 actions. In addition, it has 2 speed settings, 2 displacement modes (walking and sliding), more than 20 functions and robotic sounds. Recharge Elite Trooper with its included USB charger.

Practice your aiming by shooting one of the 5 missiles: Elite Trooper has 3 launch modes, choose one, use its arm to aim and shoot...bullseye!

Prepare for all your missions with Elite Trooper and you will be the winner. The fun is guaranteed!

Elite is friendly and a lot of fun, activate its dance mode and follow its rhythm.

Functions:

- Shoots 5 projectiles.
- Steerable arms.
- Programmable up to 50 actions and more than 20 functions.
- 2 speeds and 2 displacement modes: walks or slides, in all 4 directions.
- Robotic dance.
- Robotic sounds, music and LED lights.
- Demo mode.

Product information:

- Age: +5 years.
- Robot height: 36 cm.
- Packaging dimensions: 40 x 16 x 42 cm.
- Infrared transmitter with more than 5m range.
- Charged by USB system. Cable included.
- The remote control works with 2 AA batteries. Not included.
- The robot is powered by LiPo 3,7V, 600 mAh battery. Including.

XTREM
BOTS

JAMES

THE SPY BOT

Join James-The Spy Bot on his secret missions!

With James-The Spy Bot, you will enter the fantastic world of robotics and programming in a very fun way.

James is the world's most famous spy and now he needs your help.

Accompany him on his secret missions, program his every move, he has over 50 programmable actions and more than 20 functions. He can move stealthily by sliding or walking. His different sounds and lights will make him unstoppable.

Activate James-The Spy Bot through a secret system of communication by clapping: one clap, two claps, ... you decide! It's your secret code!

His spy mode will allow you to record conversations and listen in. But watch out for his eyes, don't let them fool you! You'll know if James-The Spy Bot is spying on you or not.

You can also record secret messages and have James-The Spy Bot deliver them in a fun way, modifying the voice so they don't find out who it is.

Activate his music and dance mode to celebrate with James-The Spy Bot the success of your missions!

Functions:

- "Spy" function records and plays back messages.
- Voice modifier.
- Clapping control.
- Programmable up to 50 actions and more than 20 functions.
- 2 speeds modes: walks or slides, in all 4 directions.
- Robotic sounds, music and LED lights.
- Demo mode.

Product information:

- Age: +5 years.
- Robot height: 28 cm.
- Packaging dimensions: 25 x 13 x 33 cm.
- The controller is powered by 2 AA batteries. Not included.
- The robot works with 3 AA 1.5V batteries. Not included.

BOTS

CHARLIE THE ASTRONAUT

Discover the secrets of space with Charlie-The Astronaut!

Charlie will be your best friend and will accompany you on your missions into space.

You are in good hands. Charlie is the most experienced of all astronauts, with thousands of space expeditions under his belt.

Connect to Charlie-The Astronaut through the App via Bluetooth on your mobile device.

From the App you can guide Charlie-The Astronaut in two different ways, program him in a simple and fun way through its programming module (up to 200 actions) or direct Charlie with its remote-control system. Charlie-The Astronaut is equipped with the most advanced technology, and you can control it through its smart control system (control with hand movements).

Charlie The Astronaut will accompany you on your journey through outer space with his fantastic 'Spacepedia' (space encyclopedia)

You will discover the secrets of the Universe, the Solar System, the spacecraft in which Charlie carried out his missions, and many other secrets of space. It includes a video explaining the Solar System.

Test your knowledge of space with more than 300 questions in two game modes: "Against the clock" or "At the limit".

Start your journey into space with Charlie-The Astronaut!

Product information:

- Age: +5
- years.
- Robot height: 29 cm.
- Packaging dimensions: 27 x 12,5 x 35 cm.
- App for iOS and Android.
- Requires a digital device. Not included.
- The robot is powered by 3 AA 1.5V batteries. Not included.

**XTREM
BOTS**

Functions:

- Control from the App: Walk or slide. App connects to Charlie via Bluetooth.
- Smart control (Control with hands movements). Possibility of activation via the App or directly from Charlie.
- Programmable from the App.
 - Up to 200 programmable actions.
 - More than 20 functions.
- Spacepedia (space encyclopedia).
- Space Quiz (Space quiz game).

Control:

- Walk and slide in 4 directions.
- Smart control (Control with hands movements).
- Gyroscopic Control (movement with the tilt of your mobile device).
- 2 speeds.
- Lights and sounds.
- Demo mode.

Spacepedia (Space Encyclopedia):

- Solar System Includes video of the Solar System.
- The Universe.
- Spacecraft and more.

Programming:

- Programmable up to 50 actions (extendable up to 200 movements).
- Movements (walking or sliding).
- 3 types of sounds.
- 3 types of music.
- Lights.

Space Quiz:

- Over 300 questions about space.
- Two game modes:
 - “Countdown”: Answer as many questions as possible in 2 minutes.
 - “To the limit”: Get as many correct answers as possible without failing.

REX

THE DINOBOT

Build and program REX, the fun Robotic Dino!

Enter the world of construction, mechanical engineering, and programming with REX-The Dinobot. Build, program and play in a simple and fun way.

Bring Rex to life by assembling 80 pieces. You will also have to build his remote control, with which you can program him or direct him with his Radio Control system. It has more than 50 programmable actions and more than 20 functions for endless hours of fun.

REX-The Dinobot, will be the guardian of your room.

Activate his 'Guardian' mode to scare intruders with his terrifying roar and other surprising sounds when someone wants to enter your room. But don't worry, REX won't eat them! He'll just scare them a little.

Spend hours of training time playing with REX. You'll be amazed by his different sounds, roars, his eyes lighting up, his stylish gait and his wagging tail dancing.

REX, the funniest Robotic Dino ever!

XTREM
BOTS

Functions:

- Over 80 parts to build REX-The Dinobot and the controller.
- "Guardian" function: Detects movement, roars, walks, and makes sounds.
- Programmable up to 50 actions and more than 20 functions.
- 2 speeds and 2 displacement modes: walks or slides, in 4 directions.
- Articulated tail.
- Eyes light up.
- Realistic dinosaur sounds (roaring, breathing, footsteps...).

Product information:

- Age: +8 years.
- Robot height: 50 cm.
- Packaging dimensions: 50 x 7 x 35 cm.
- Infrared transmitter.
- Includes stickers to decorate REX-The Dinobot.
- The remote control works with 2 AA batteries. Not included.
- The robot works with 4 AA 1,5V batteries. Not included.

Easy assembly through the full-colour step-by-step instruction manual. Also includes an explanation video.

SPIDER BOT

BUILD | PLAY

SPIDER BOT

Build this awesome spider with realistic movements and test your mechanical skills!

Get into the world of construction and mechanical engineering with the Spider Bot construction set.

With this complete set of more than 100 assembly pieces, you will be able to build a robotic spider with which to put into practice your STEM skills, logical thinking and problem solving.

You will be amazed with its hyper-realistic way of moving. Spider Bot will slide back and forth, thanks to its internal motor.

Spider Bot has been designed to have fun, accessible and intuitive to build. Its detailed, full color manual and assembly video will guide you step by step to complete this fantastic robotic spider.

Functions:

- Build a spider with more than 100 assembly pieces.
- Unidirectional movements: forward & backward.
- Its 6 legs imitate the movements of a spider in a realistic way.
- Includes battery motor.

Product information:

- Age: +7 years.
- Spider height: 24x20x10 cm.
- Packaging dimensions: 32 x 24 x 10 cm.
- Includes decorative stickers.
- Spider Bot works with 3 AA 1.5V batteries. Not included.
